sales@esurv.co.uk

**HomePlus describes our unique consumer proposition and the range of tailored products and services available to buyers and homeowners across the UK.**

It complements but is different from the suite of RICS home survey products we continue to offer.

1

HomePlus offers the **convenience and flexibility** of a Digital Home Survey, an **independent property valuation**, and guidance on a range of property-related matters

2

The HomePlus Digital Home Survey report includes everything found in a standard RICS Level 2 Home Survey report, but it's **digitally interactive** and available through a personalised account.

3

Through the HomePlus website, customers can also **obtain a free, no obligation quotation** for a Digital Home Survey, **book an appointment**, and **pay online**.

4

HomePlus includes a **free pre and post inspection consultation** during which customers can discuss any concerns about the property before the inspection and review the survey findings with the surveyor after the inspection.

## Why should buyers invest in a survey?

A valuation is not a survey. Only an independent residential survey is designed to identify any defects in a property.

## How much is a HomePlus Digital Home Survey from e.surv?

Prices start at £499 for a HomePlus Digital Home Survey (without valuation).
